

Why Choose Student Research in the College of Agriculture?

Research experience enriches a student's educational career. It is especially valuable for ethnic minorities, who will gain an opportunity to work with a faculty mentor and learn about career opportunities in food, agriculture, and related sciences. Contributing to a research project is an experience that will provide new insight to a student's academic program. Student researchers work with the most modern facilities and equipment, and they will interact with industry professionals, as well as campus research supervisors.

Research areas vary. We offer a summer-long grain science project that includes cereal chemistry, bakery sciences, and more! Students will have the opportunity to work on research projects during the academic year or the summer. Summer fellowships are usually more intensive and come with a stipend to cover all expenses. All majors encouraged to apply.

Graduate Programs

- Agricultural Economics
- Agribusiness
- Agronomy
- Animal Science and Industry
- Food Science and Industry
- Genetics
- Plant Pathology
- Grain Science
- Entomology Graduate Certificate
- Horticulture, Forestry and Recreation

Financial Support

- Paid internship, housing and traveling paid.
Stipend to be used or personal expenses.

K-State College of Agriculture Diversity Programs Office

The Diversity Programs Office serves as a catalyst to promote diversity awareness. It is our responsibility to help faculty, staff, and students understand the value of diversity. We provide access to pertinent resources to assist departments in developing solutions. We work diligently to establish realistic diversity goals each department can successfully meet. The DPO also hosts the Kansas State Chapter of Minorities in Agriculture, Natural Resources and Related Sciences (MANRRS) for undergraduate and graduate students.
